

1997 Offshore Yachts Sedan - Island Girl

Semi-custom bluewater cruising motoryacht · Palm Beach Gardens, FL

ASKING

\$330,000

Island Girl is a 1997 Offshore Yachts Sedan, a semi-custom motoryacht from a yard whose reputation rests on one thing: motoryachts engineered to go offshore and stay comfortable doing it. Where most production boats this size are built for the marina and the occasional bay run, an Offshore is built to cross open water, ride a real sea with composure, and bring everyone aboard home easy. That pedigree does not fade with the model year. It is in the bones of the boat.

This is a yacht for the owner who wants distance without giving up the feeling of home. Inside, the joinery and finish are the kind that hold their value because they were done right the first time. Outside, she has the sea manners that let you pick a longer day, a farther anchorage, a real crossing, with the family aboard and confidence to spare.
